

RHT Fintech Holdings is a fintech and financial services group, which forms part of the RHT ecosystem of professional services, delivering regulated capital market and full sponsor services, regulatory compliance for financial institutions, intellectual property, patent technology protection, and public and investors' relations.

Apart from our expertise in traditional capital market advisory, we have expanded our capabilities to offer alternative fund-raising platforms via blockchain technologies and tokenisation of assets, to help clients capitalise on the potential of their digital assets with greater accessibility and transparency.

### ➤ RHT RHT Blockchain

RHT Blockchain Advisory provides asset tokenisation services to businesses seeking to raise funds. Similar to securitisation, asset tokenisation converts assets (e.g. real estate, loans, leases, equities, receivables, etc.) into marketable securities (specifically, security tokens) for the purpose of raising cash by selling them to other investors via legal/regulated digital assets exchanges that run on blockchain technology.

### ➤ RHT RHT Capital

RHT Capital has a team of qualified professionals with a wealth of experience in financial advisory services in the capital markets including initial public offering, reverse takeovers, secondary equity and debt fund raising, mergers and acquisitions as well as corporate actions by companies listed on SGX. The team also supervises and guides Catalist-listed companies on their continuing listing rules and obligations and compliance with the corporate governance code.

### ➤ RHT RHT Communications & Investor Relations

RHT Communications & Investor Relations provides strategic counsel to organisations, offering insights to strategise and implement effective corporate, financial and stakeholders' communications programmes. The team helps clients to develop and strengthen internal and external stakeholder relations through highly targeted public relations programmes and campaigns.

### ➤ RHT RHT Compliance Solutions

RHT Compliance Solutions comprises experienced and certified professionals with extensive regulatory, compliance and risk management experience from Singapore, Hong Kong and the region. The team aims to provide clients with insightful, risk-focused and cost-effective solutions through their extensive experience in serving a wide spectrum of clients across diverse financial sectors from regulators, asset managers, fintech firms, insurance agents and brokers, remittance to commodities and corporates services.

### ➤ RHT RHT i-Assets Advisory

RHT i-Assets Advisory is a full-service Intellectual Property (IP) consultancy company with experienced IP professionals who have the technical background and commercial experience to address the full life cycle of IP and advise on the potential use of IP. We help clients to maintain a competitive advantage and create new businesses and income streams.

### ➤ SDAX

SDAX is a Singapore blockchain based exchange, for listing and trading of securitised tokens (STOs) and digital assets, pending licensing from the Monetary Authority of Singapore. It provides a platform to match investors to new project development opportunities, as well as fund raising options for real estate owners and accredited investors. SDAX adopts recognised and reliable technology solutions to provide a digital, real-time and secure trading platform for digital assets.
